Spatial in day-to-day business

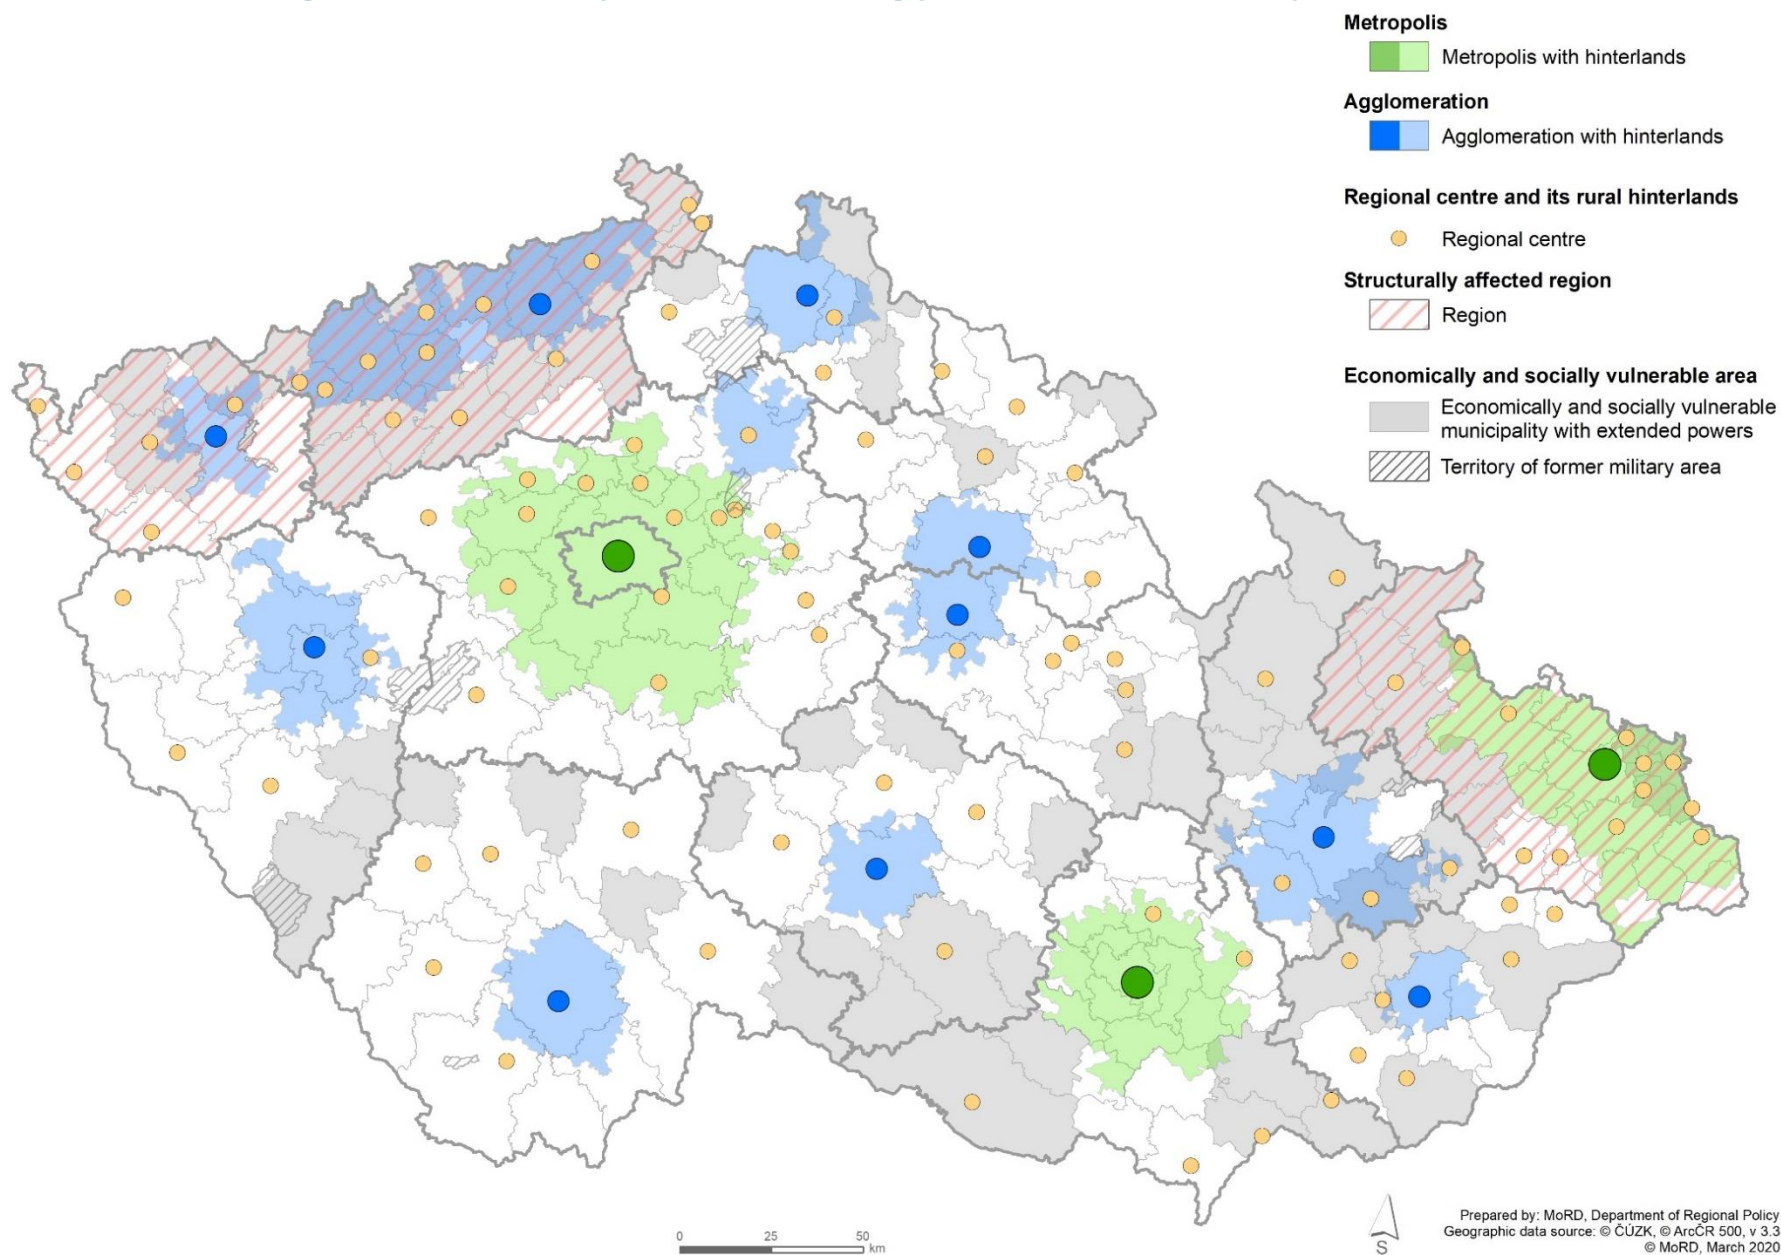

Our "categorizations" of territories

Regional Development Strategy of the Czech Republic 2014–20

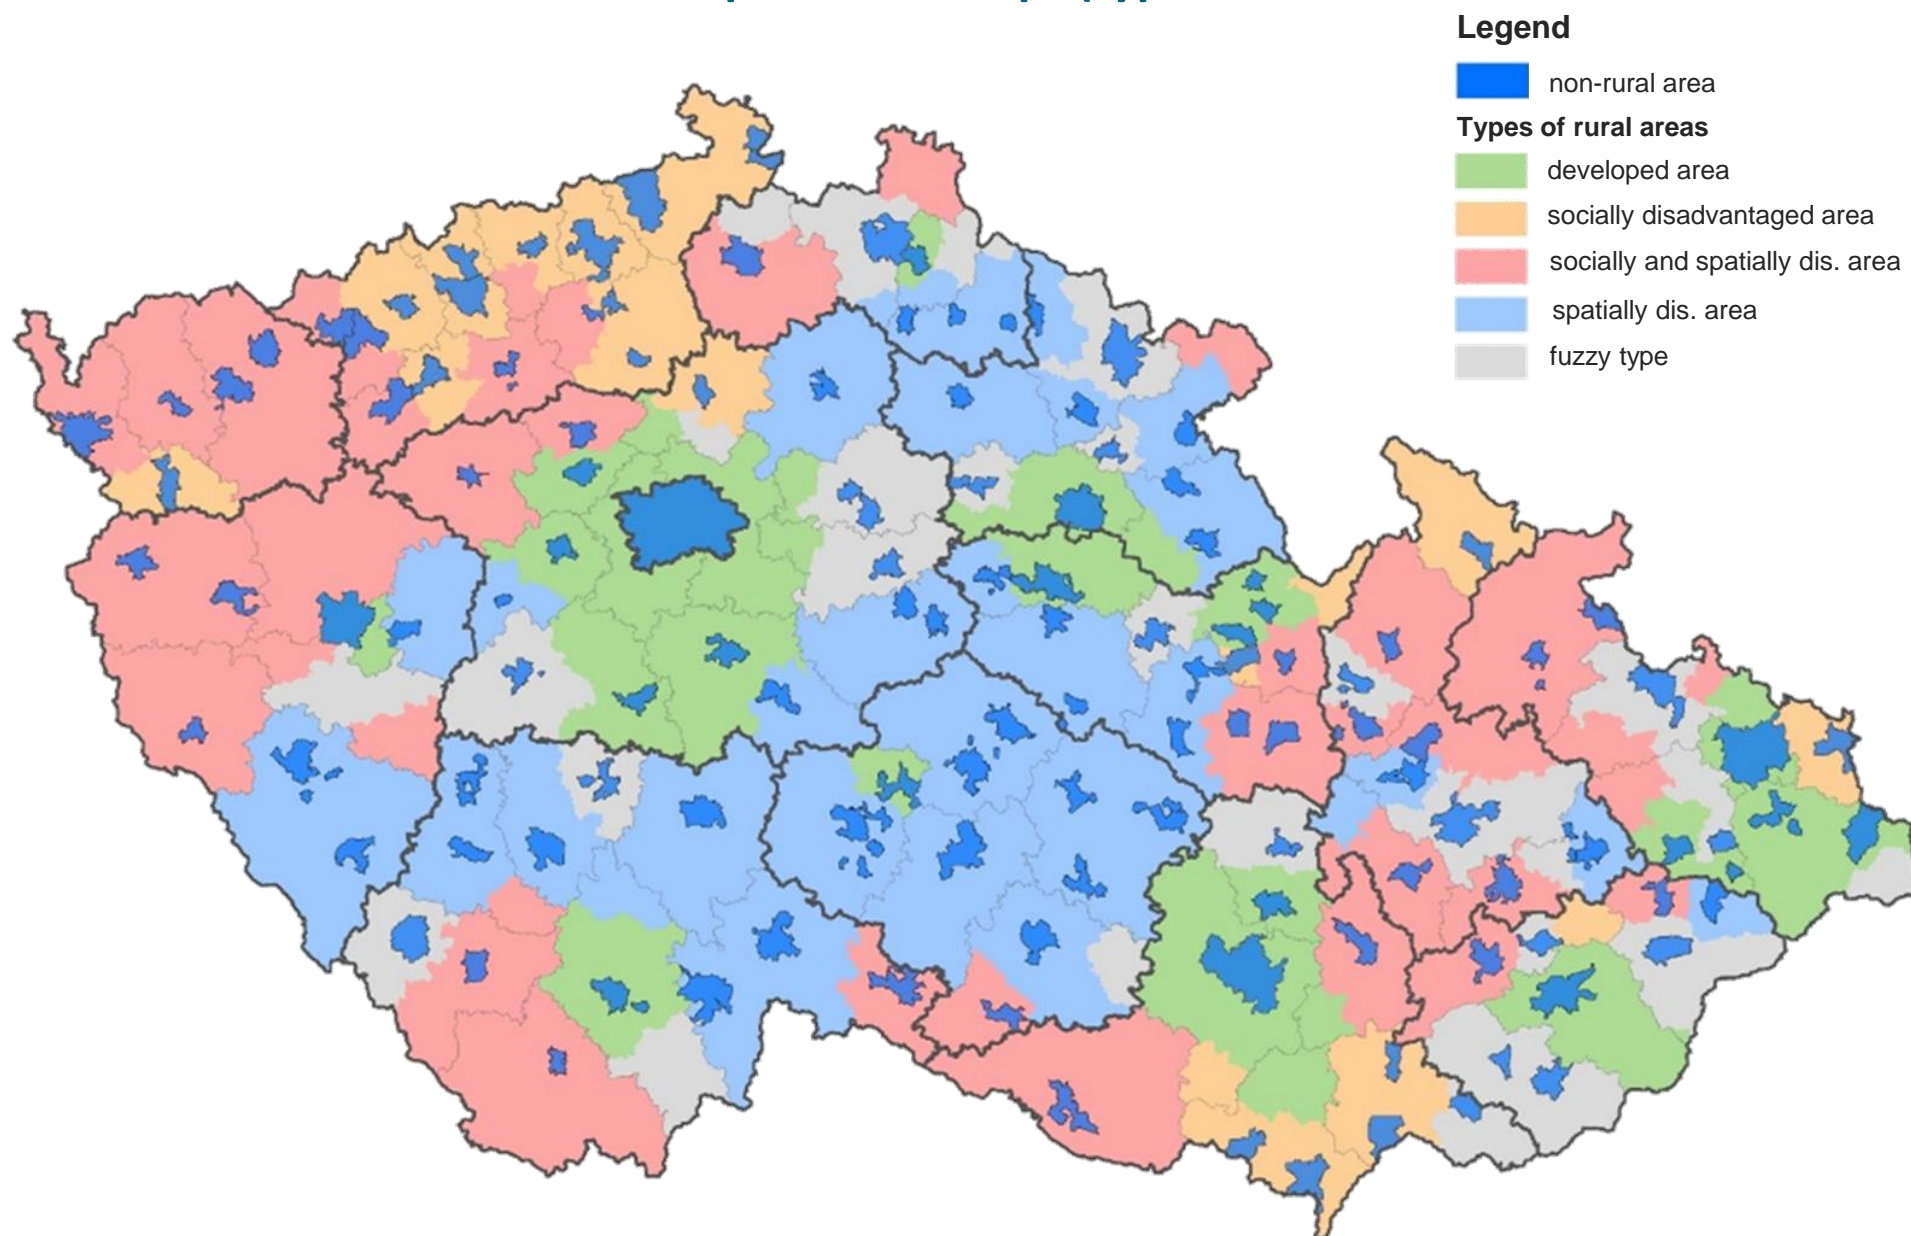

Our "categorizations" of territories

Regional Development Strategy of the Czech Republic 2021+

Our "categorizations" of territories

Rural Development Concept (types of rural areas)

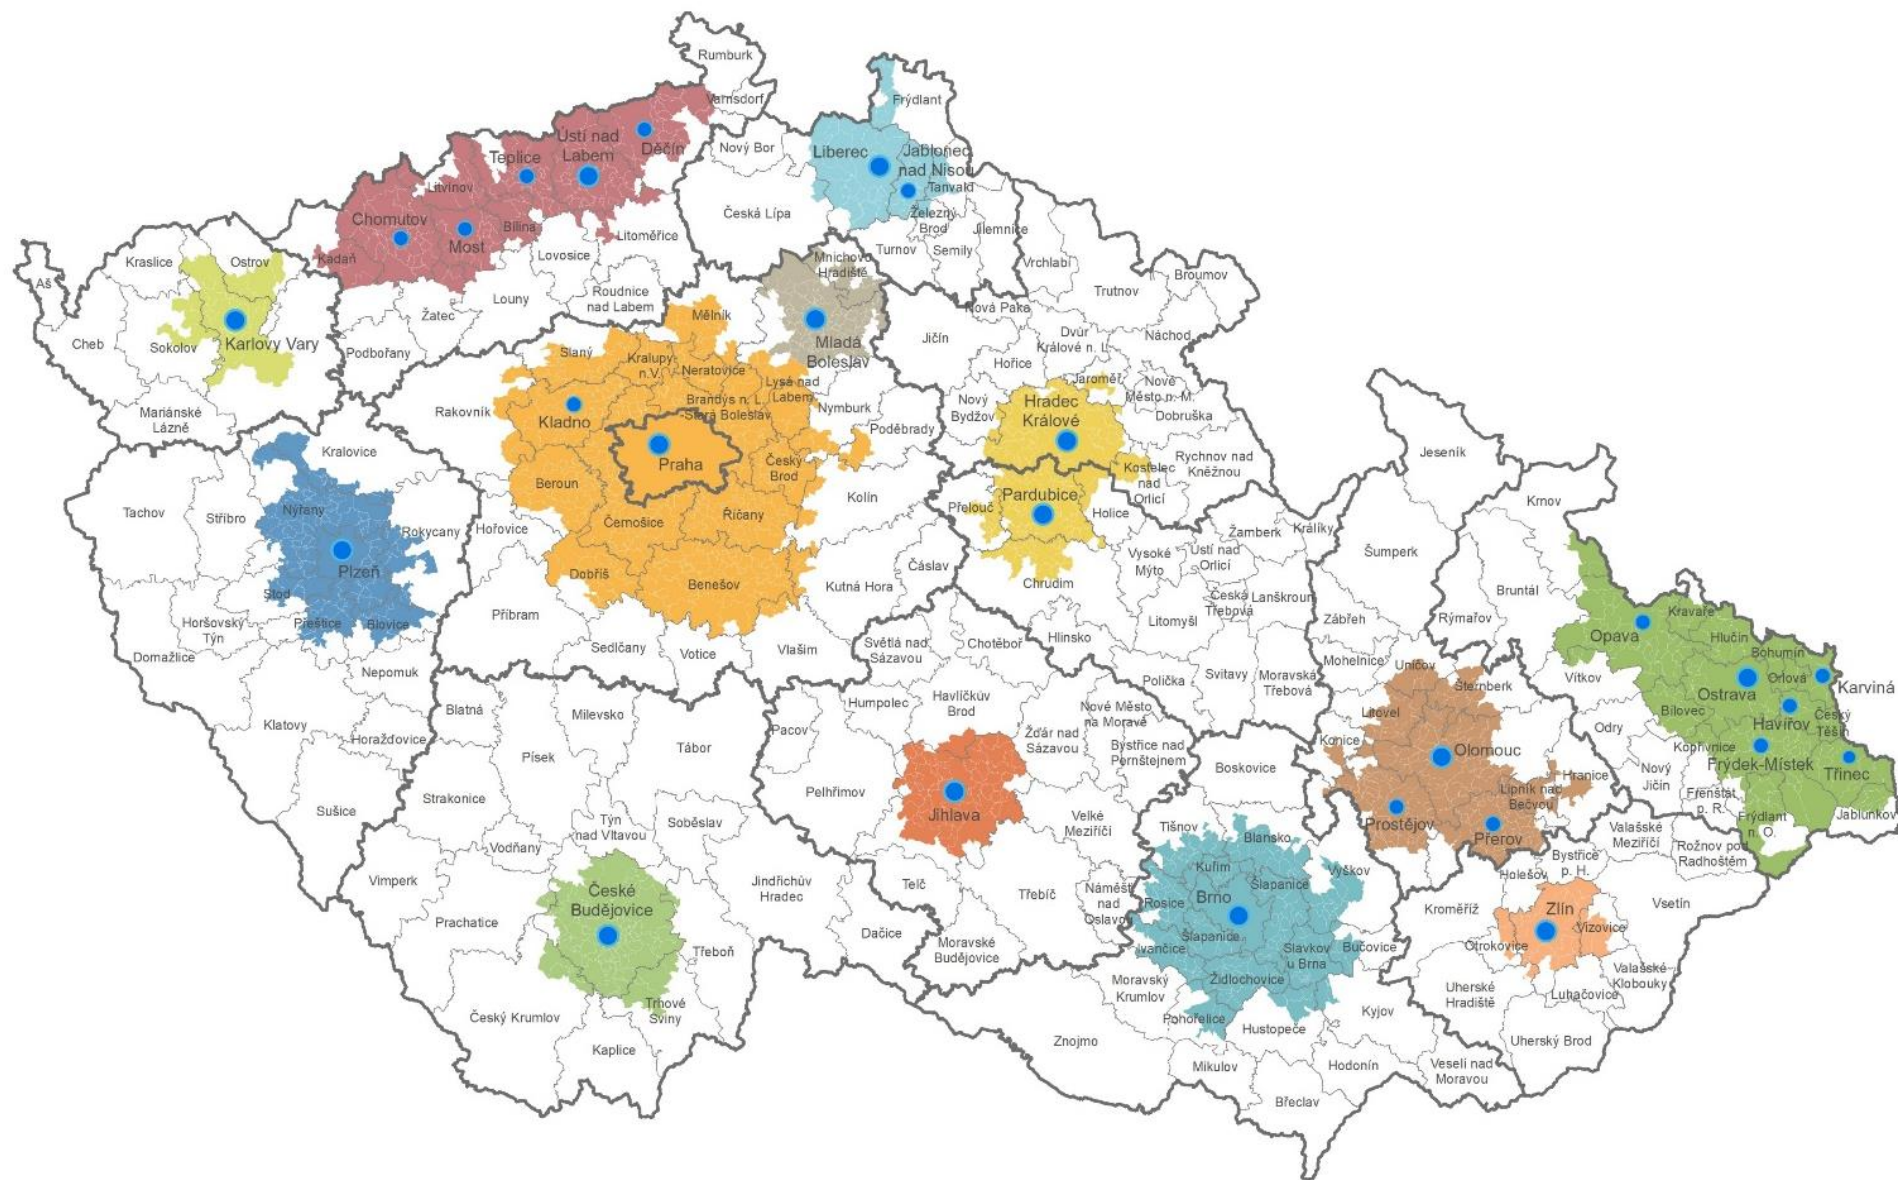

This was at the beginning of our typology of rural areas

(outcome of "Socio-economic development of peripheral regions of the Czech Republic, taking into account the development needs of individual regions" project)

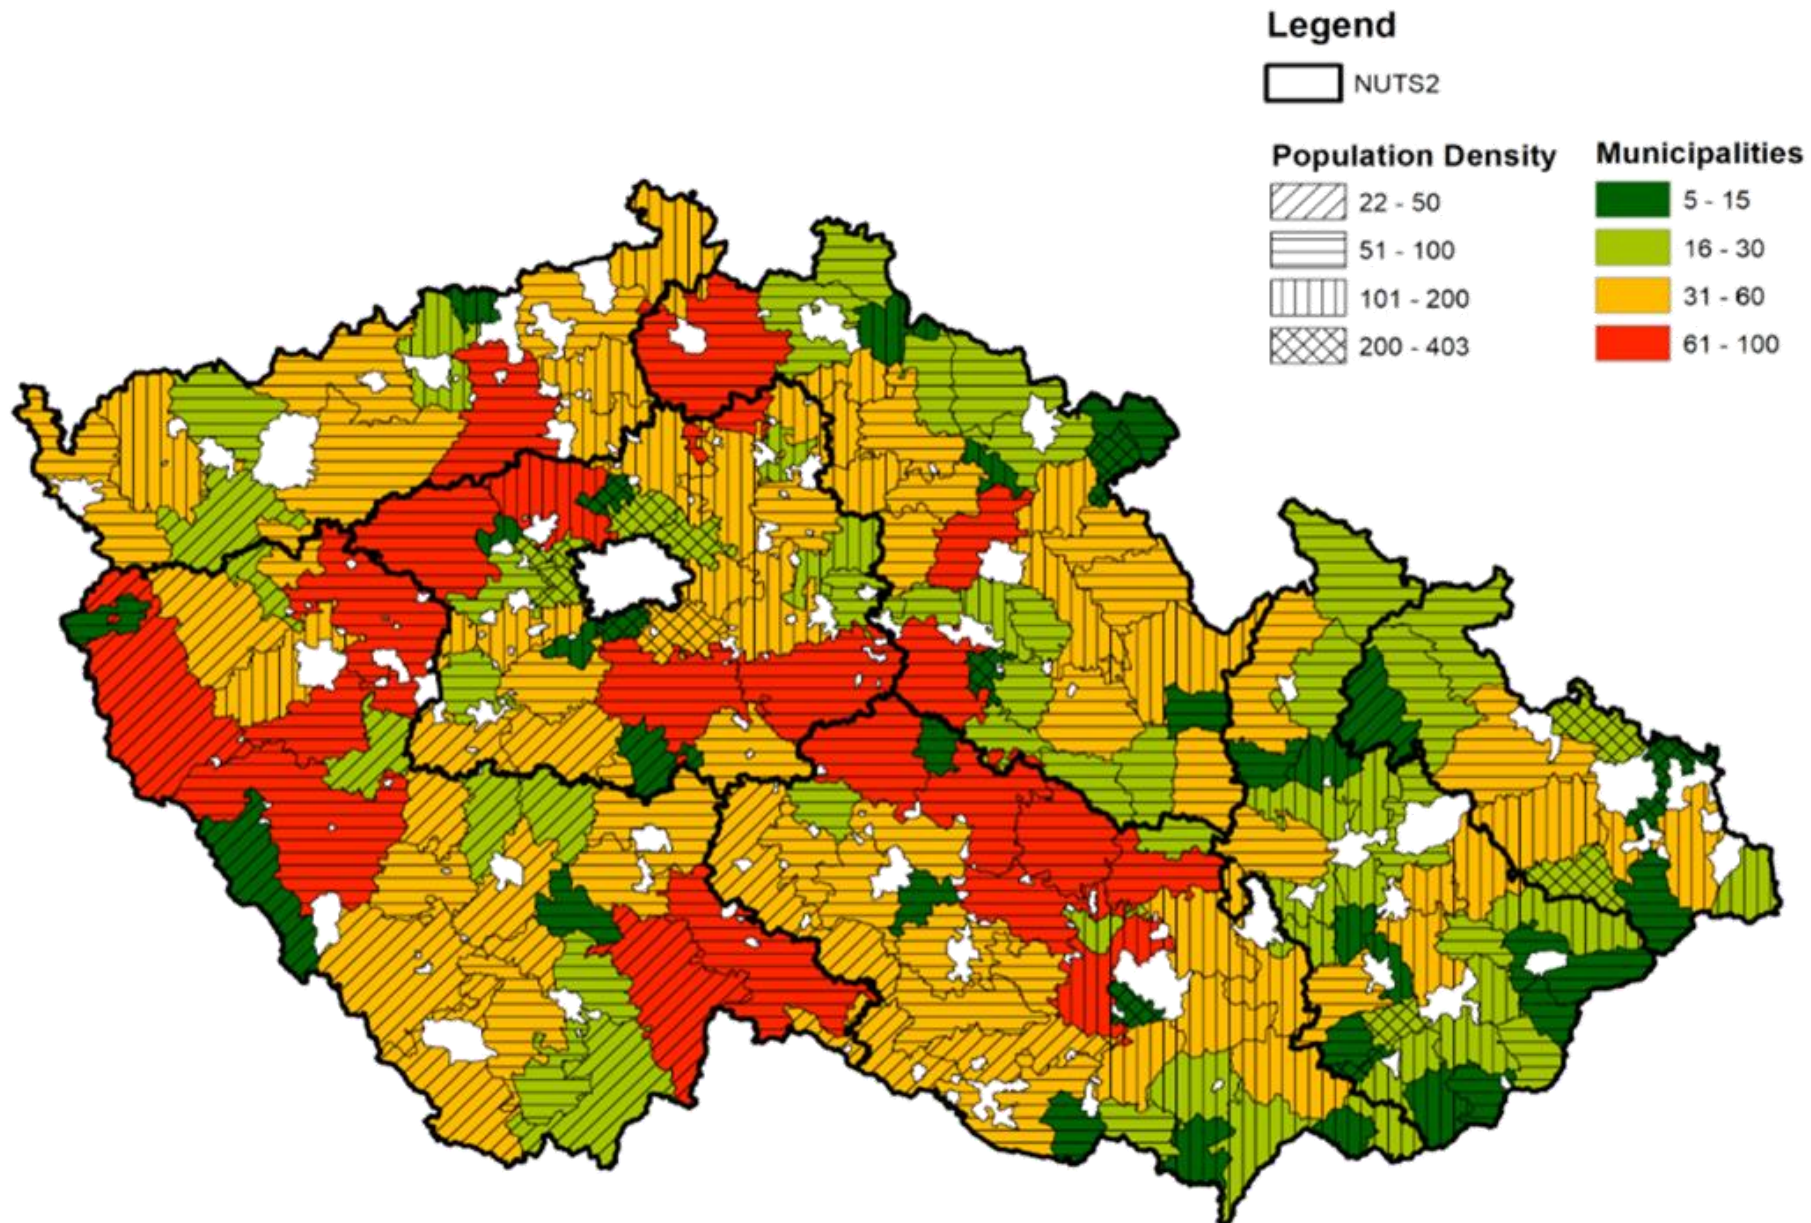

ITIs (Metropolis & Agglomerations with hinterlands by Regional Development Strategy 2021+)

Spatial/territorial dimension in instruments

Local action groups territories

Spatial/territorial dimension in instruments

Economically and socially vulnerable regions & Structurally affected regions

Economically and socially vulnerable areas

Territories with poor results in housing construction, age index, population growth, unemployment rate and intensity of business activity

Creating conditions for the development of innovative businesses

Accessible for transport and equipped with basic services

With strong communities and deep roots

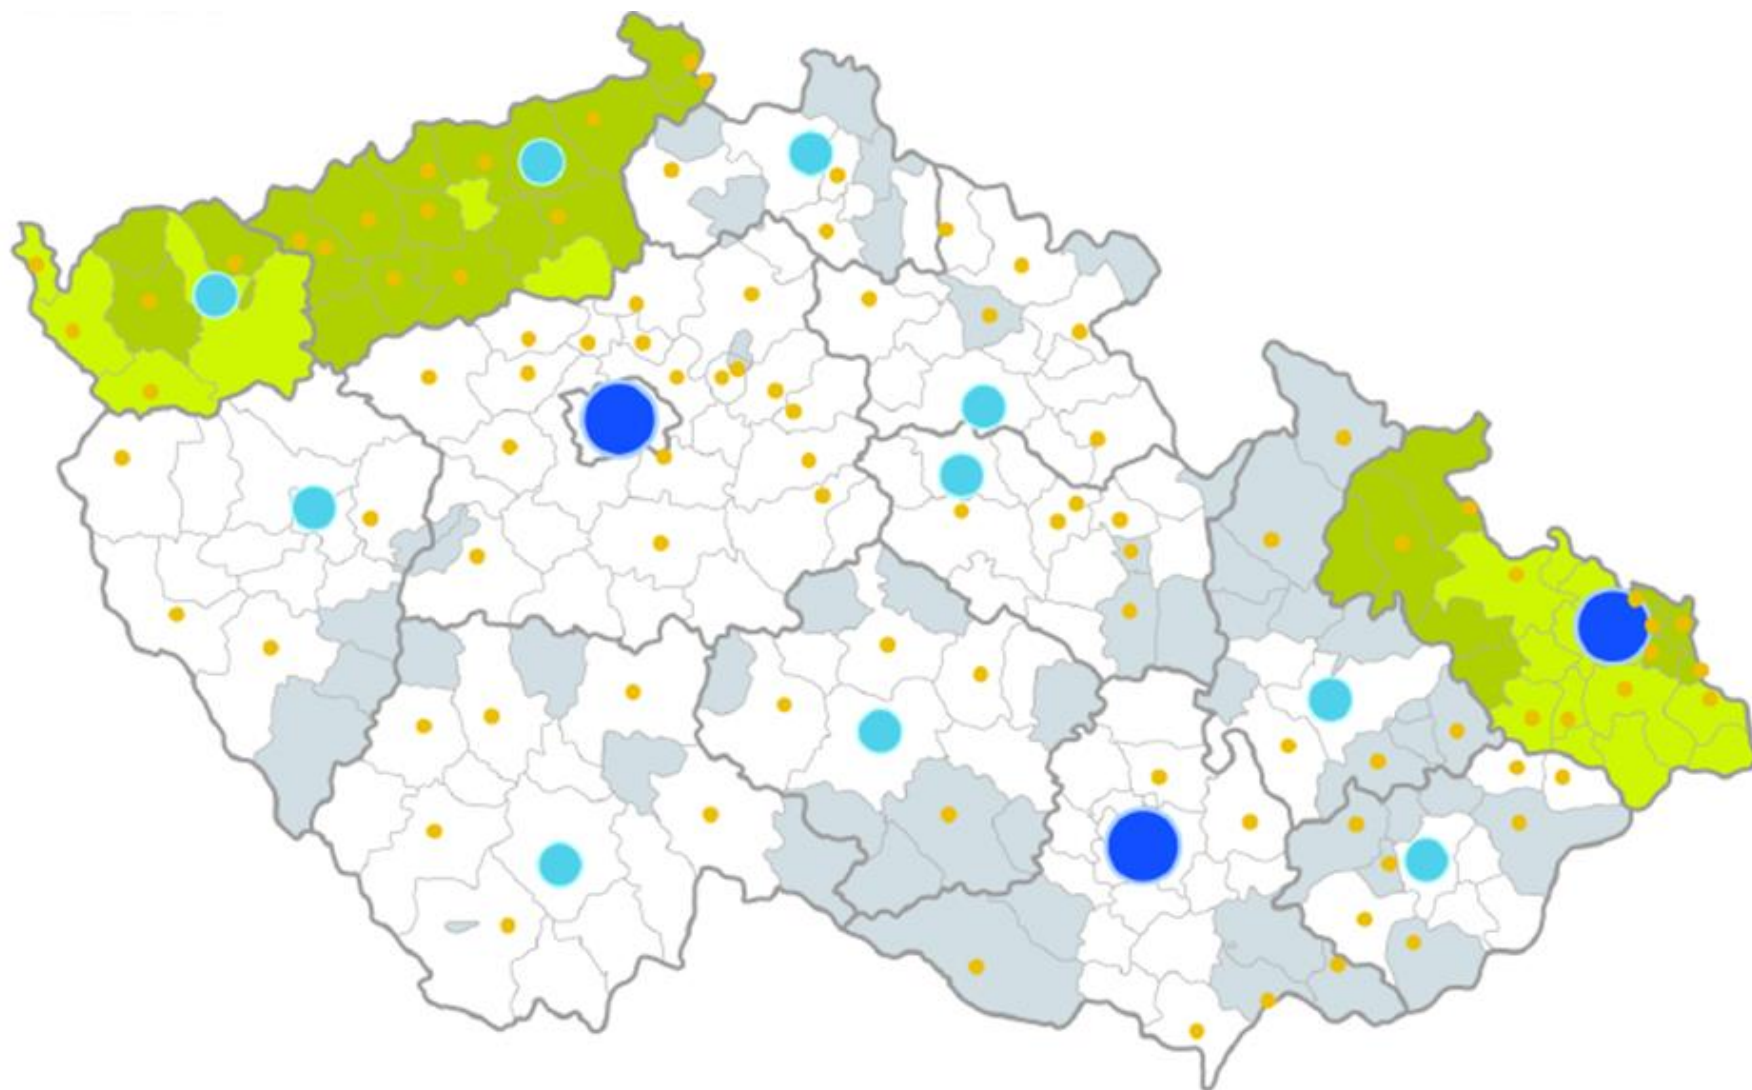

Structurally affected Regions

The Ústí nad Labem, Moravian-Silesian and Karlovy Vary Regions

Good standard of life with a healthy environment

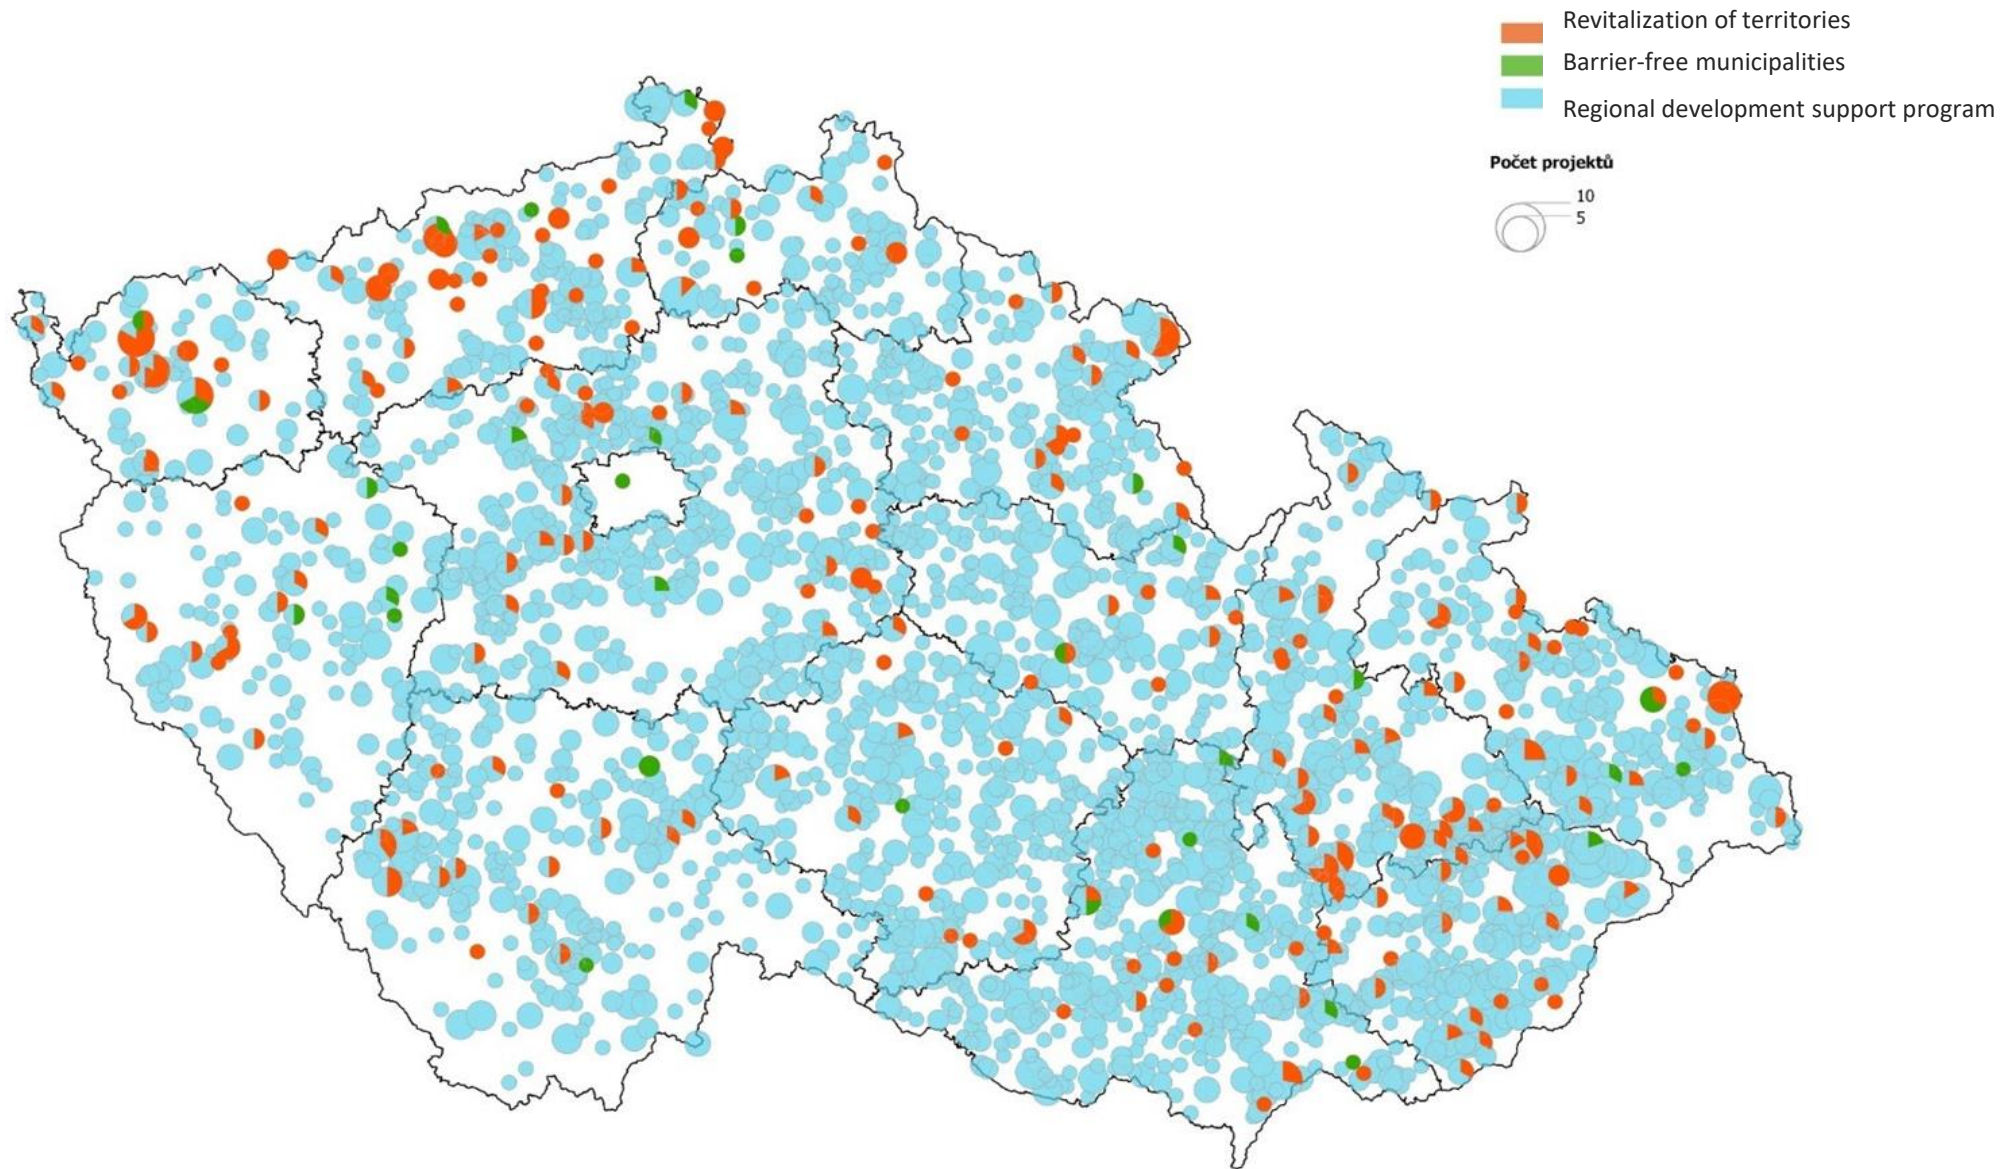

Economic recovery with plenty of quality jobs

Without unused industrial sites and areas after mining

Spatial/territorial dimension in outcomes

Selected subsidy programs of MoRD CZ

Free and Interactive
